Carlsberg Group — Confidential

OpenAI

71.7/100

AMBER RISK

OpenAI has been assessed across 8 compliance dimensions with an overall score of 71.7/100 — AMBER risk.

Dimension Scores

Dimension	Score	Flag	Key Findings
Security, Privacy & Compliance	84/100	GREEN	OpenAI demonstrates a strong security posture with industry-standard certifications (SOC 2 Type II, ISO 27001) and robust encryption (TLS 1.2+, AES-256). Data privacy is well-addressed through the use
Vendor Viability & Continuity	60/100	AMBER	LLM analysis unavailable: RetryError[]
Integration & Data Integrity	80/100	GREEN	The vendor demonstrates high security maturity with SOC 2 Type II and ISO 27001 certifications, AES-256 encryption, and TLS 1.2+, which are enterprise-grade standards. Data integrity is supported by a
Legal & IP	62/100	AMBER	The vendor demonstrates strong IP protections, explicitly assigning output ownership to the customer and allowing for a full training opt-out (ZDR mode), which mitigates primary AI-related IP risks. S
Cost & Commercials	58/100	AMBER	The risk is primarily commercial and legal rather than pricing-specific. While the pricing model is transparently 'usage-based', there is a complete absence of cost caps, guaranteed pricing tiers, or
Operations & Change Management	77/100	GREEN	OpenAI demonstrates high technical and security maturity with SOC 2 Type II and ISO 27001 certifications, strong encryption standards, and a clear GDPR framework (via OpenAI Ireland Ltd). However, ope
Global Scalability	84/100	GREEN	OpenAI demonstrates strong global scalability through its partnership with Microsoft Azure, providing the necessary cloud infrastructure to support operations across 50 countries. Regulatory scalabili
Product Maturity & Delivery	70/100	AMBER	OpenAI demonstrates high product maturity and a strong delivery track record for enterprise clients. The vendor is currently in production with enterprise customers, utilizing established models (GPT-
